

Project 16878 EZ: Mahogany Corner Shelf

Those who like jigsaw work will find this an enjoyable project. It can be made from 1/4" thick solid mahogany, as this antique original is, or from 1/4" mahogany plywood. Most any other hardwood plywood is also suitable.

Schematic

Mahogany Corner Shelf Step-by-Step Instructions

1. Use a power planer or a sharp hand plane to reduce all solid stock to 1/4" dimensions.
2. Make sure that one side measures 7-3/4", the other 8".
3. Cut all parts to size.
4. Use glue and finishing nails to join sides.
5. Stain all edge grain on plywood to hide laminations.
6. Finish with two coats of polyurethane.

These plans were originally published in Volume 5, Issue 6 of *The Woodworker's Journal* (Nov./Dec. 1981, page 29).
